CAREER PROFILE

Aspiring analyst with experience delivering user-validated, data-driven features in healthcare and fintech settings. Skilled in translating user needs into scalable, tech-enabled products. Experienced in enterprise system rollouts, stakeholder coordination, and testing workflows across agile teams.

SKILLS

- Enterprise Systems: SAP BRIM, Confluence, Visio
- QA and Automation: UAT, regression testing, Python test automation, defect tracking
- Programming and Data: Python, SQL, R, Tableau, Excel (macros, VLOOKUP)
- Analysis: Requirements analysis, process mapping, workflow documentation, stakeholder coordination

WORK EXPERIENCE

Income Insurance, Business Excellence Intern

May 2026 - Aug 2026

- Identified operational bottlenecks and streamlined processes using Visio for workflow mapping, translating findings into actionable roadmaps for business improvement
- Analysed end-to-end customer experience data across multiple channels and touchpoints to surface actionable insights
- Collaborated with cross-functional stakeholders to develop briefing materials, presentations, and operational guidelines, leveraging Confluence for project documentation
- Supported digital transformation initiatives by participating in testing and validation of AI and analytics-driven automation solutions relevant to insurance operations

Synapse, System Analyst Intern

May 2025 - Dec 2025

- Supported rollout of the National Billing System across public hospitals, ensuring accurate charge flows and patient billing
- Led UAT and mass rapid testing in SAP BRIM, verifying data integrity and system logic ahead of go-live
- Logged and triaged 300+ incident tickets during go live, working with interface teams and end users to diagnose and resolve issues
- Built Excel based data mapping and error tracking tools using macros and VLOOKUP
- Documented system workflows and issue resolution steps, adopted as internal team reference

Accenture, Business Analyst Intern

May 2022 - Aug 2022

- Prepared test data for testing in SIT and UAT phases
- Conducted execution and analysis of test scripts
- Maintained the defect repository and tracked issues through to closure
- Refined user specifications documents and guides

EDUCATION

National University of Singapore

Aug 2023 - Present

Bachelor of Computing in Information Systems

- Enrolled in the NUS College Program: Interdisciplinary curriculum + global collaboration
- Finance Attaché, NUS College Club (Budget Planning & Optimization)
- Proficient in tools and software such as SQL Workbench, R Studio and Tableau
- Impact Experience Project in Vietnam: Developed AI-based tool for sustainable farming using automated data analysis
- Relevant Coursework: Database Management · Data Visualization · Enterprise Systems · Server-Side Development

Nanyang Polytechnic

Apr 2020 - Apr 2023

Diploma in Business & Financial Technology

- Final GPA: 3.94/4.00
- Received OCBC Bronze Medal Award
- Admitted into Director's List in 2022S2, 2021S2, 2021S1, 2020S2, 2020S1
- Activities & Societies: Mentoring Club, Peer Supporter Club

PROJECTS

NUS-Synapse IMDA AI Innovation Challenge

Mar 2026

- Built a full stack medication management platform enabling caregivers, clinicians, and patients to track doses and reduce medication errors, with role based access across four user types.
- Implemented adaptive dose reminder timing using Thompson Sampling, learning each patient's actual adherence patterns including weekday versus weekend differences.

Hack4Good 2026 — Developer Group @ NUS Computing

Jan 2026

- Built an agentic AI grant discovery platform that matches organisations with relevant funding opportunities based on needs and eligibility criteria.
- Implemented multi-agent workflows using Gemini 1.5, FastAPI/React, and Playwright-based scraping of OurSG grants

Agentic AI Insurance Chatbot — SingHacks 2025

Nov 2025

- Scoped problem statement and designed solution architecture for AI-powered insurance advisory platform within 48-hour hackathon
- Built multi-agent system with specialised modules for policy intelligence, document parsing, and real-time quote generation
- Delivered a working demo showcasing personalised plan recommendations and a guided quote-to-purchase user flow for travel insurance scenarios.

CERTIFICATIONS

- Intermediate SQL — DataCamp (Nov 2025)
- Data Manipulation with pandas — DataCamp (Nov 2025)
- Google Cloud Computing Foundations: Networking and Security — Google Cloud Training (Sep 2022)
- IBM Blockchain Essentials — Cognitive Class (Dec 2021)
- ACA Cloud Computing — Alibaba Cloud (Sep 2020)
